EXTERNAL TRAINING/PROGRAM

Basic Occupational First Aid, CPR & AED Training

On 1st - 2nd and 7th - 8th September, LCSC has organized BOFA training with CERT Academy for L3 contractors. The training was conducted in CERT Academy office at Puchong and was divided into two sessions where each session was limited to 30 participants only.

KY Mesra managed to send 11 staffs to join both session 1 and 2. The training include of basic first aid, how to conduct CPR and how to use AED machine correctly. Participants also learned on how to react and response during emergency situation and how to deliver helps correctly for any victims.

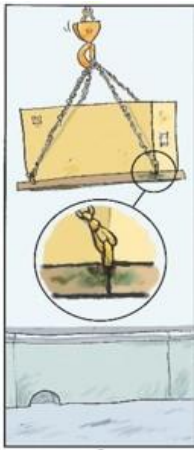

HSSE Sharing Space Near Miss / Potential Incident

Why you must report NM/PI?

SHOW YOU CARE!

- NM/PI reported shows that you alert and know what is going on your surrounding.
- With NM/PI, you shows that you acknowledge of any unsafe act and the unsafe condition exist.
- NM/PI is such a medium of sharing where the information of what kind of hazards exist and what controls to put in place and what controls must be taken.

Unsafe condition.

Potential Incident
May come from machine/tools/surrounding

Unsafe act

Potential Incident
May come from human behaviour

Near miss

An incident occurs but no illness/injury or damage happen

Accident

An accident occurs causing illness/injury or damage to property or environment

REMEMBER!

If there is any unsafe condition or situation or unsafe act = **POTENTIAL INCIDENT**

POTENTIAL INCIDENT **INCREASES** risk of **NEAR MISS** and **ACCIDENT** to happen

AVOID HARMFUL POSSIBILITIES, A NEAR MISS NOT REPORTED IS THE NEXT ACCIDENT
