

## Quality Policy

### **Statement of Policy on Quality**

We, in the course of carrying out our activities to achieve our business objectives, we hereby undertake to ensure the engagement in the procurement, fabrication, maintenance service, electrical and mechanical service, and fuel system service within the oil and gas and other related industries, and is committed to be excellence in meeting the quality of its products and services as per applicable codes, statutory requirements and customer specifications by:

- Adopting excellence in everything we do
- Strict compliance to applicable standard and regulation for all our activities
- Emphasis on customer service
- Create customer value with a vision of future customer expectations and compliance obligations
- Recognition of total involvement and participation of the entire workforce

We will actively pursue ever improving quality to ensure success based on continual improvement and customer satisfaction through programs that enable our team to do our job right the first time and every time.
